Task Title:

-----  
Title:- OTT Platform Website Clone.

Task Description:

-----  
Design and implement a responsive & functional OTT Platform named FlexMovies.

Steps Taken:

-----  
Identified elements to include all the pages like homepage, listpage and details page.  
Style the pages with CSS and Add some basic functionality by JavaScript & then use TMDB Api to autogenerate movie lists & details

Challenges Faced:

-----  
Dealing And Handling the API.

Solutions Implemented:

-----  
Create HTML document to structure the UI.  
Apply CSS styling to enhance the appearance of WebPages.  
Implement Functionality By JavaScript and call API to give the final blow.

Learnings:

-----  
Project provided an opportunity to gain hands on experience with APIs and their integration into the web and Learn about implementing search functionality enable users to find specific content.

Project Update:

-----  
After weeks of dedicated efforts, I am pleased to announce the successful completion of the OTT Platform clone project. This project aimed to replicate the functionality of a popular OTT streaming platform by leveraging API integration, responsive design & user-friendly navigation.
